

THE ONE TO GROW WITH

PRODUCT GUIDE

NPK

NPK MAX

NPK PLUS

General Description

The perfect combination of nutrients and release longevities are provided in this homogeneous pellet. Each pellet contains nitrate, ammoniacal nitrogen, phosphorus, and potassium to deliver healthy, holistic growth to ornamental crops.

- This polymer-coated NPK is the industry standard for crop consistency.
- Ideal for GREENHOUSE, CONTAINER NURSERY STOCK, and PROPAGATION.
- Economical source of nitrogen (it is highly recommended to provide supplemental nutrition that includes micronutrients when using NPK formulations).

APEX® 14-14-14 NPK with GAL-XeONE®

Use this product for short-season production with a balanced 1:1:1 ratio of plant nutrition. This product is best for BEDDING, FLOWERING, and FRUITING commercial production crops.

3-4 months

APEX® 19-6-13 NPK with GAL-XeONE®

Use this product to meet the nutritional needs of CONTAINER GROWN ANNUALS and PERENNIALS as a full-season NPK source.

5-6 months

APEX® 19-6-12 NPK with GAL-XeONE®

Use this product to meet the nutritional needs of CONTAINER GROWN ORNAMENTAL TREES and SHRUBS as an NPK source in all growing climates.

7-8 months

APEX® 18-6-12 NPK with GAL-XeONE®

Use this product on full-season crops such as most WOODY ORNAMENTALS and PROPAGATION LINERS and plants grown for SUPERIOR FOLIAGE.

10-11 months

APEX® 13-13-13 NPK with GAL-XeONE®

Use this product for woody ornamentals and propagation. Higher ratio of phosphorus for earlier root development.

10-11 months

APEX® 17-6-12 NPK with GAL-XeONE®

Use this product to provide the nutritional needs of all SEASON LONG CONTAINER GROWN CROPS. Uses include incorporation for baseline feed of WOODY ORNAMENTALS.

12-13 months

APEX® 16-5-11 NPK with GAL-XeONE®

Use this product incorporated in media for containerized plants needing nutrition longer than a full season. This product can be used as a long-term baseline NPK feed for all-season plus production crops.

14-15 months

NPK MINIS

APEX® 18-6-12 NPK Minis with GAL-XeONE®

A professional mini-sized homogeneous 3 to 4 month controlled-release fertilizer for propagation and container-grown annuals. All of the nutrients in this product are combined within each uniform coated pellet, ensuring precise distribution and release.

3-4 months

All release rates are at 70° Fahrenheit

General Description

Use NPK Max on all FOLIAGE, NURSERY, and GREENHOUSE crops where the ease of application and stand consistency is a must. All NPK MAX formulations have GAL-XeONE® polymer-coated primary, secondary, and micronutrients to provide consistent nutrition to the plant-based on stated longevities. Also contains EDTA Iron chelate to keep the iron in a readily accessible form for plant uptake.

APEX® 17-5-11 NPK MAX with GAL-XeONE®

• Longevity for short-term annual greenhouse crops.

• Perfect for short-term ANNUAL crop production.

3-4 months

APEX® 16-5-10 NPK MAX with GAL-XeONE®

• Ideal for ANNUALS with extended shelf life.

• Perfectly suited for herbaceous perennials.

• Incorporate in late winter for seedlings

5-6 months

APEX® 15-5-10 NPK MAX with GAL-XeONE®

• Longevity suited for FULL SEASON crops in most climates.

• Incorporate in late fall to generate root development and will hold until late spring sales.

8-9 months

APEX® 14-5-10 NPK MAX with GAL-XeONE®

• Longevity best suited for incorporation.

• Use for SEASON PLUS BROADLEAF EVERGREENS.

11-12 months

General Description

Use NPK Plus formulated to provide the majority of the primary, secondary and minor elements that are essential for healthy root formation and controlled top growth development.

APEX® 19-6-10 NPK Plus with GAL-XeONE®

Use this product to meet the nutritional needs of CONTAINER GROWN ANNUALS and PERENNIALS as a full-season NPK source.

4-5 months

APEX® 16-5-9 NPK Plus with GAL-XeONE®

Use this product to meet the nutritional needs for crops valued for foliage such as ROSES and HERBACEOUS PERENNIALS. Over 1.5% iron is added to provide extra sheen and darker green leaves for plants prized for their foliage. For use in GREENHOUSES and other over-wintering structures.

6-7 months

APEX® 22-6-8 NPK Plus with GAL-XeONE®

Use this product to meet the season-long nutritional needs of CONTAINER GROWN TREES AND SHRUBS. Good release in cooler climates. Residual nutrients promote next spring's growth in cooler growing areas.

8-9 months

APEX® 22-6-12 NPK Plus with GAL-XeONE®

A cost-effective, general-purpose fertilizer designed for outdoor container nursery production. Specifically formulated to deliver nutrients consistently based on specified temperatures.

8-9 months

The APEX® line of fertilizers feature application specific formulations that incorporate GAL-XeONE® control-release technology. The coating process of GAL-XeONE® enables consistent, predictable nutrient delivery for up to 18 months. APEX® longer term soil incorporated fertilizers eliminate the need for top dressing on most plants.

Patented Technology Developed with NASA

- Simplot GAL-XeONE® is a controlled-release fertilizer with an advanced polymer coating technology that controls nutrient release.
- The proprietary reactive layer coating was created with support from NASA's Space Alliance Technology Outreach Program.
- The strong, yet thin coating on GAL-XeONE® uses cross-link polymers that allow for a nutrient boost upfront followed by controlled-release.

World-Class Fertilizer Performance

- GAL-XeONE® fertilizer boasts a patented polymer technology that reduces leaching and volatilization of applied nutrients.
- The durable coating reduces lag time from application to initial nutrient release without sacrificing longevity.
- GAL-XeONE® release curves are tested at 100° F for superior quality and control.

EVERGREEN

General Description

APEX® Evergreen is formulated to meet the nutritional needs of continuous-feed and single-flush CONIFERS and BROADLEAF EVERGREENS that require supplemental nutrition that can leach in heavy rainfall production sites. The NPK coating levels are blended to provide a “gentle” start, early root development with more branching and fuller plants. Encourages fall bud development.

APEX® 19-6-9 Conifer with GAL-Xe^{ONE}®

Use this product on all season plus crops that are kept outside during the entire growth cycle.

- Formulated for continuously flushing conifers.
- Steady release of nutrients offers year-round feeding.
- Adequate amounts of nutrients are provided to prevent deficiencies common with rapidly growing conifers.
- Higher levels of magnesium, iron, and sulfur to hold color in cooler growing conditions of the Pacific Northwest.

10-12 months

APEX® 21-7-8 Evergreen with GAL-Xe^{ONE}®

Use this product for all full-season container crops in warmer climates and season plus in cooler northern and moderate coastal climates.

- Recommended for general spring incorporation.
- Great for finishing season plus crop in mild climates.
- Excellent for ericaceous crops.

8-9 months

APEX® 20-8-8 Evergreen with GAL-Xe^{ONE}®

Use this product as a season plus for all climates as this product will maintain good color for more than a season.

- Cooler climates: Recommended for fall application.
- Warmer climates: Recommended for year-round applications.

10-12 months

TOPDRESS

General Description

These TOPDRESS products are recommended for all container crops that require supplemental and immediate supply of nitrogen, phosphorus and potassium.

APEX® 21-7-6 Cool Weather Special with GAL-Xe^{ONE}®

A high-quality, professional 3-4 month controlled-release fertilizer for CONTAINERS, BEDDING PLANTS, and LANDSCAPE AREAS.

- Use where you want to promote a more rapid response during cooler temperatures.
- High iron produces dark green foliage to hold fall and winter colors for early spring sales.

3-4 months

APEX® 21-5-6 Super Iron Topdress with GAL-Xe^{ONE}®

Use this product as a high-quality, professional controlled-release fertilizer for top dressing, broadcast, or incorporation application of trees and shrubs.

- Use as a year-round top-dress fertilizer.
- Use in the fall to hold foliage and winter colors.
- High iron produces dark green foliage to hold fall and winter color for early spring sales.

4-5 months

APEX® 22-6-7 Full Season Plus Iron with GAL-Xe^{ONE}®

This product contains staged release nutrients with higher amounts of iron.

- Apply in the spring to provide season-long nutrition.
- Higher amounts of iron to help maintain green color.

6-7 months

APEX® 22-6-10 Full Season Topdress with GAL-Xe^{ONE}®

This product contains staged release nutrients to provide season-long nutrition.

- Use in spring to provide season-long nutrition for most deciduous trees and shrubs.
- Provides an additional source of slow-release potassium, magnesium, and sulfur to help maintain color and plant vigor throughout the growing season.

6-7 months

SPECIALTY

APEX® 0-46-0 Micro-Sized Monocalcium Phosphate / Dicalcium Phosphate

A high-quality micro-sized phosphorus fertilizer. Excellent for bedding plants. Low phosphate solubility to extend nutrient release. Low fluorine levels for use on fluorine-sensitive crops.

APEX® 12-4-12 Palm K with GAL-Xe^{ONE}®

A professional, high-quality, control-release fertilizer specifically formulated for palms with a 3:1:3 ratio with extra magnesium and a set of micronutrients. This formulation also works well for topdressing nursery containers and landscape applications

3-4 months

APEX® 21-2-7 Low P with GAL-Xe^{ONE}®

Specially formulated for plants that are sensitive to high rates of phosphorus or are more efficient in phosphorus uptake. Mycorrhizae formation is greater when fertilizers with lower amounts of phosphorus are used.

8-9 months

APEX® 38-0-0 Preplant

This product is a long-lasting, slow-release nitrogen source. Helps counteract nitrogen drawdown in composting piles and contains sulfur as a secondary nutrient.

3-5 months

APEX® Micronutrient Formulation

This product is specifically formulated to provide most secondary and micronutrients for plant uptake throughout the growing season. The fine particle size ensures uniform distribution of nutrients throughout the soilless media.

GAL-Xe^{ONE}® 43-0-0

This product helps counteract nitrogen drawdown in a composting pile. A highly effective control release fertilizer.

3-4 months

APEX® SAPPHIRE Polymer-Coated Aluminum Sulfate Powered by GAL-Xe^{ONE}®

This product is a slow-release, polymer-coated aluminum sulfate, with 7.5% aluminum (Al) derived from aluminum sulfate and 12% sulfur (S), designed to increase the development of the blue flower color in blue hydrangeas.

90 days

Dimension® 270G Turf and Ornamental Landscape Pre-emergent Herbicide

This micro-sized, pre-emergent, granular herbicide provides excellent control of most broadleaf weeds and annual grasses found in turf, landscape, field grown, and container ornamentals. This virtually dust-free formulation is very cost-effective when compared to other popular pre-emergent herbicides.

The GAL-Xe^{ONE}® Curve is a free application that provides the nitrogen release data on GAL-Xe^{ONE}® fertilizers.

Using and navigating the GAL-Xe^{ONE}® Curve is easy and intuitive—all of the input fields and data results are located on a single screen.
