

The J.R. Simplot Company

ALL IN ON SAFETY

HOW IT WORKS

J.R. Simplot pays an annual subscription fee to ISN to facilitate the contractor management process through ISNworld. ISN services include the review and verification of key pieces of information submitted by contractors to streamline the contractor management process.

GETTING STARTED

Contractors are required to pay an annual fee to ISN to complete the qualification process for work at J.R. Simplot. Once payment is received, contractors will receive access to their ISN account and J.R. Simplot's requirements. To sign up for ISN, please [click here](#).

ISN subscription pricing is all-inclusive. Contractor annual fees are calculated on a scale based on the average number of employees over the past three years. For pricing information, please visit the ISN homepage.

If your company is a current subscriber, there is no additional fee; however, please ensure you have completed J.R. Simplot's requirements.

BENEFITS

ISNworld streamlines the prequalification process for contractors. With a subscription, a contractor can submit information for multiple Hiring Clients in one centralized location. This eliminates the amount of duplicative work required from each Hiring Client and saves the contractor time and resources.

Contractors use their ISNworld profiles to market services to new Hiring Clients. Company profiles are searchable by 800+ ISN Hiring Clients and can include information such as office locations, work types, logos, brochures, and awards.

ISN's Learning Management System (LMS) Platform provides complimentary high-quality, computer-based training material to our contractor customers in order to satisfy training needs and Hiring Client Requirements.

ISN provides resources and informational videos to assist contractors in the development and implementation of effective health, safety, and environmental programs.
